Addendum #2

Re: Metro Emergency Operations Center of Kanawha County Request for Proposals for Microwave Radio Communication System Design-Build Services

Date: 8/7/17

**Proposal Due Date: Proposals must be received on or before Tuesday, August 15, 2017 at 2:00 pm EST at Metro Emergency Operations Center of Kanawha County - Attention Jim Mangus
200 Peyton Way
Charleston, WV 25309**

Addendum #2 is being issued to include the following edits and/or clarifications:

- 1. The RFP does not mention channel bank /nor DSO's. Is it correct channel bank is NOT required for this proposal?**

Include the Intraplex ACS163 as DSO's will be needed (Channel Bank w/3 VF25 Cards).

- 2. It is mentioned that "Routers and switches will be provided by the proposer." Is the "proposer" here referring to other vendors?**

"Routers" is mentioned for informational purposes only. List Switches as OPTIONAL ITEMS – Switches = Metro 24 port SW, & NWS 4-8 port SW unless unavailable then 16 port; SIRN should provide a way to interface at Garfield. The goal of this RFP is the transport of info and picking up/adding a port for one T1 at the NWS Radar Site to Garfield (needing BW from one end to the other) for the future ability to add equipment/links, etc. as outlined in the main RFP.

- 3. Eclipse radios can work with Cisco routers and switches. However, Cisco ASR1000 routers (and 3560X switches) in the state network were previously provided by another vendor.**

(BTOP)

- 4. The RFP does not have requirements for routers and switches so if proposers do need to quote proposers would need a bit more information on the requirements.**

ISR3945 24 port SW or compatible -- see above info re: switches.

- 5. The Cisco Catalyst 2960 switches provided in previous WV project were for OEM devices management using legacy TDM radio payload. It appears these routers are End-of-Life now, and the replacement is 2960-Plus.**

Metro shouldn't need routers -- ISR3945 24 port SW Information Service not autonomous system.

6. **Can you confirm the completion date? “Proposer must provide quote for performance bond guaranteeing satisfactory completed work no later than December 1, 2017.” Since there is a clause about liquidated damages, and proposers don’t know the award date or start date, proposers need to be sure before accepting those terms. Is it correct that proposers have 10 calendar days from issuance of RFP to submit any exceptions?**

The award will depend on the number of proposals submitted. Metro views this project as time-valued because of the deadline date of December 1, 2017. The award will be announced as quickly as possible.

The specifications of the original Request for Quotations dated 7/28/17 are to be included as a part of this Addendum #2.

Once quotations are unsealed, all documents become public record. Metro Emergency Operations Center reserves the right to reject any and/or all proposals and to waive any informality in bidding.
